GEETANJALI JANGDE

FULL STACK DEVELOPER

geetanjalijangde1999@gmail.com | +91 9399107337 | Github | Linkedin

EXPERTISE OVERVIEW

Full Stack Developer with 4+ years of professional experience in full stack web development, frontend development, backend development, REST API development, database management, and cloud deployment. Technical expertise includes JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, MongoDB, MySQL, Redux, AWS, and Firebase.

.

Experienced in responsive web design, authentication, payment gateway integration, application security, and performance optimization.

SKILLS

- Programming Languages: JavaScript, TypeScript, Python, C/C++, SQL
- Frontend Development: React.js, Next.js, React Native, Redux, Tailwind CSS, Material UI, Bootstrap
- Backend Development: Node.js, Express.js, PHP, RESTful APIs
- Databases: MongoDB, MySQL, Firebase, SQLite
- Cloud & DevOps: AWS, Google Cloud, Nginx, Linux
- Tools & Platforms: Git, GitHub, Postman, Jira, VS Code, Android Studio, Figma
- Core Concepts: DBMS, Data Structures & Algorithms, Operating Systems, Computer Networks, Agile Development, Responsive Web Design
- Security: JWT Authentication, Role-Based Access Control (RBAC), API Security
- Third-Party Integrations: Cashfree Payment Gateway, Firebase Integration

WORK EXPERIENCE

Software Developer(L6) | Arceus Infotech Pvt. Ltd, Mumbai, Maharashtra **Sept 2025 - Present**

Deployed at Chhattisgarh Infotech Promotion Society (CHiPS), Nava Raipur, Chhattisgarh

- **Aadhaar Offline Verification (OVSE) Integration – Visitor Tracker Application**
  - Developed the complete frontend for an Aadhaar-based visitor tracking application with separate login interfaces for Premises Users and Administrators.
  - Integrated QR code-based redirection to the official Aadhaar App for real-time face authentication.
  - Designed a seamless visitor verification workflow to simplify identity verification and improve the user experience.
  - Built a responsive interface for managing visitor verification processes and application workflows.
- **Chhattisgarh Aadhaar Grievance Portal (CHiPS)**
  - Spearheaded the frontend design and development of the CHiPS portal, creating intuitive and user-friendly interfaces for multiple user roles.
  - Developed dedicated dashboards and workflows for District Coordinators (DC), E-District Managers (EDM), and Operators.
  - Implemented the Operator Onboarding Process, enabling operators to register, submit required details, and complete the onboarding workflow.
  - Developed a comprehensive Aadhaar Grievance Management System to facilitate grievance registration, processing, escalation, and resolution.
  - Implemented grievance workflows through which issues raised by operators are routed to E-District Managers (EDMs) for review and further processing.
  - Integrated the grievance escalation workflow with UIDAI, enabling grievances to be forwarded to UIDAI through the respective EDMs for further action.
  - Developed grievance tracking functionality to monitor the status, progress, and resolution of grievances, helping EDMs track actions taken and pending issues.
  - Implemented wallet integration to enable wallet-related functionality within the portal.
  - Integrated frontend components with backend APIs to ensure seamless data exchange, workflow management, and overall portal functionality.

- **Aadhaar Sub-AUAs Onboarding and Grievance Tracker Application (AUA/KUA) – CHiPS**
  - Designed and developed the complete frontend for a centralized onboarding and grievance tracking application.
  - Built a user-friendly, single-page interface with simplified interactions for managing projects, categories, subcategories, and tracking updates.
- **CHiPS Aadhaar Face Authentication Gateway App – UI/UX Design**
  - Designed a complete mobile application UI/UX in Figma for the CHiPS Aadhaar Authentication Gateway.
  - Created user flows and screens for onboarding, Aadhaar details entry, face authentication, verification status, and success/error scenarios.
  - Designed interactive and user-friendly interfaces to simplify the Aadhaar authentication process.
  - Maintained consistent design patterns across authentication screens, loading states, and verification workflows.

Full Stack Developer | Beaming India, Raipur, CG **Mar 2024 – Sept 2025**

- **Nexify World – Vehicle Management Platform**
  - Architected and developed responsive web interfaces for a vehicle management platform, delivering seamless user experiences across multiple application modules.
  - Designed and developed an admin panel to manage platform operations, service workflows, and administrative activities.
  - Integrated map services to support location-based functionality and streamline vehicle pickup and drop-off processes.
  - Implemented payment gateway integration to enable secure online transactions and simplify payment workflows.
  - Integrated REST APIs to ensure seamless communication between frontend components and backend services.
- **ZookStay – Hotelier & Guest Booking Platform**
  - Developed a responsive hotel booking platform featuring destination search, check-in/check-out selection, guest management, and property listings.
  - Built interactive property cards, popular destination sections, promotional deals, and hotel discovery interfaces to enhance the guest booking experience.
  - Integrated APIs to support property data, booking workflows, and dynamic content rendering.
- **Chhattisgarh Commercial Tax (GST) Department Portal**
  - Developed and enhanced the frontend interface for a government GST portal, focusing on structured content presentation and user-friendly navigation
  - Implemented organized sections for GST services, tax rules, notifications, circulars, and taxpayer resources..
  - Built reusable UI components for service categories, quick links, help centers, and notification panels.
  - Designed responsive layouts to improve accessibility and usability across different screen sizes.
- **Politech Future Solutions – Corporate Website Development**
  - Developed a responsive corporate website showcasing election management, political campaign solutions, and data analytics services.
  - Implemented structured service sections, case studies, company news, team information, and contact forms.
  - Built reusable UI components and responsive layouts to ensure consistent presentation across devices.
  - Integrated contact forms and supporting website components to streamline client inquiries and business communication.

Full Stack Developer | Programmics Technology, Raipur, CG **Jul 2023 – Mar 2024**

- **Programmics Technology – Corporate Website Development**
  - Developed responsive website interfaces showcasing IT services, technology solutions, and company projects.
  - Implemented structured sections for service offerings, portfolio projects, client testimonials, company information, and contact details.
  - Built reusable frontend components and responsive layouts to deliver a consistent user experience across devices.
  - Collaborated with the team to implement modern UI designs aligned with business requirements.

- **SPARKCARS – EV Rental & Subscription Management Platform**
  - Developed administrative panels to manage EV rental operations and the overall mobility ecosystem.
  - Implemented charging station management functionality, enabling administrators to add, update, and manage EV charging station locations.
  - Integrated map-based location features to support charging station identification and location updates.
  - Built responsive admin interfaces and integrated REST APIs for seamless data management and operational workflows.

Full Stack Developer | Prixso Software Pvt. Ltd. **Nov 2021 – Jul 2023**

- **Relaxation Arena – Online Wellness Booking Platform**
  - Developed an online platform that allows users to explore wellness and body relaxation services and book appointments based on their preferences.
  - Implemented a streamlined booking workflow to simplify service selection, appointment scheduling, and booking management.
  - Designed an intuitive user interface to help customers navigate available services and access booking options effortlessly.
- **Taxi Wala – Online Taxi Booking & Transportation Platform**
  - Developed a web-based taxi booking platform enabling customers to book round-trip rides, local transportation, and corporate travel services.
  - Implemented an online booking form to capture passenger details, pickup and drop-off dates, travel preferences, and vehicle selections.
  - Designed vehicle listing sections to showcase available taxi options, including Innova Crysta, Scorpio, Ertiga, and Swift Dzire.
  - Built service sections for city-to-city travel, local transportation, and corporate bookings to simplify ride selection.
  - eveloped customer inquiry forms and responsive website sections to improve accessibility and streamline the booking experience.
- **IOS Furniture – Office & Residential Furniture Website**
  - Developed a responsive corporate website showcasing office furniture, residential furniture, workstations, and customized furniture solutions.
  - Implemented an online booking form to capture passenger details, pickup and drop-off dates, travel preferences, and vehicle selections.
  - Built interactive product galleries and structured navigation to improve product discovery and user experience.
  - Developed client inquiry forms to facilitate customer inquiries and furniture requirements.
- **Schon– Architectural Product Showcase Platform**
  - Crafted a premium digital experience for showcasing aluminium doors, windows, and contemporary architectural solutions.
  - Translated design concepts into visually rich web interfaces featuring luxury product collections and architectural project portfolios.
  - Structured product categories and showcase galleries to help customers explore design options and product specifications.
  - Built elegant, responsive layouts aligned with the brand's premium positioning and modern architectural aesthetics.
  - Optimized content hierarchy and navigation to create a seamless product discovery experience.

EDUCATION

CSVTU - Chhattisgarh Swami Vivekanand Technical University, Bhilai, CG **2018–2021**
Bachelor of Technology (B.Tech) in Computer Science and Engineering
Krishna Engineering College
CGPA: 8.66/10 | 2018–2021

CERTIFICATION

Web Technologies Training **2019**
Software Solution (Sensible Computer)
Technologies: HTML, CSS, JavaScript, PHP, Bootstrap
Duration: August 2019 – September 2019

DATE : 30-10-2026 **GEETANJALI JANGDE**
